

WHITMORE PARK PRIMARY SCHOOL

Halford Lane
Coventry CV6 2HG

Thursday 2nd March 2017

Dear Parents/Carers

Year 3 – Dissection

As part of our Science curriculum in the Summer term, Year 3 will be studying the human body and its skeletal and muscular systems. To enable the children to have a deeper understanding of the ways in which these systems work, where appropriate we would like the children to look at and possibly dissect some animal organs (chicken joints).

This will be done in the most hygienic way possible, with children wearing disposable aprons, gloves and, of course, washing their hands thoroughly with anti-bacterial hand wash. Any dissection will be carried out under careful supervision to ensure all healthy and safety procedures are followed.

This will provide the children in Year 3 with an exciting opportunity to discover for themselves how joints and bones in our body actually work through an engaging, practical activity.

If you have any concerns about this then please contact Mrs McGibney by Monday 6th March 2017.

Thank you for your continued support.

Yours sincerely

Year 3 teachers and Mrs Pharoah (Science Lead)
